## Technical Skills

**Web:** HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
**UX/Analytics:** Responsive design, accessibility (WCAG), layout systems; GA4, dashboards, KPI design
**Tools:** Git, GitHub, GitLab, Vercel, VS Code, Figma

## Experience

**Software Project Manager & Web Developer**                          2024 – Present
*Fund Homecare Canada*                                                          *Remote*

- Led the design and development of a responsive analytics dashboard used by nonprofit stakeholders to track engagement and outcomes.
- Translated stakeholder needs into structured, accessible layouts and clear content hierarchy.
- Coordinated frontend implementation using Next.js and Tailwind to ensure mobile compatibility and visual consistency.

**Co-Chair**                                                                    2023 – 2025
*SheHacks+ (Women in Tech Society)*                                        *Western University*

- Maintained and updated event-related web content, layouts, and information architecture for a large student community.
- Coordinated with technical and non-technical teams to ensure content accuracy and timely updates.
- Led over 30+ team members in organizing Canada's largest all women and non binary hackathon

## Projects

**Personal Portfolio Website**                                        *Next.js, Tailwind, Vercel*

- Designed and developed a responsive, mobile-first portfolio using Next.js and Tailwind CSS while prioritizing accessibility and readability.
- Structured project case studies and writing sections to clearly communicate technical and design decisions.
- Integrated analytics to monitor engagement and improve navigation, layout, and content clarity.

**Clean Your Room (Java Adventure Game)**                              *Java, OOP, Architecture*

- Developed a modular Java adventure game using object-oriented design and clear separation of concerns.

## Education

**Western University**                                                          Expected 2026
*B.Sc. Double Major: Computer Science & Psychology*                            *London, ON*

## Certifications

IBM Full-Stack Developer Professional Certificate (Coursera) — Frontend Web Development (Coursera)
